SLIDE & TURN DOORS

AWARD-WINNING SLIDE AND TURN
DOORS WITH NARROW SIGHTLINES

Advanced aluminium slide and turn doors with innovative technology

Since 2000 IDSystems has been at the forefront of home improvement product innovation; bringing some of the most advanced glazing systems to the UK market for the first time.

Manufactured in the UK to a Swiss design, the innovative vistaline slide and turn doors offer an industry leading combination of precision engineering, advanced thermal performance and ultra-slim 45mm sightlines. The thermally broken system consists of individual, non-connected panels that can be stacked to one end to create complete openings and yet, when closed, provide superior protection from the elements while offering advanced security.

System operation

To demonstrate how the unique vistaline slide & turn doors operate, along with the advanced design features and exclusive performance we have created a video introduction as part of our popular Virtual Showroom.

To watch the video visit idsystems.co.uk/vistaline or scan this QR code ►

Designed for exterior use, the system is available with a flush track that still offers a high weather rating. The vistaline system is highly engineered with the running gear alone containing more than a hundred individual Swiss-designed components. The vistaline system can be up to 2,650mm high with each panel up to 1,100mm wide. The doors are triple glazed and can achieve a U-value as low as just 1.1W/m²K.

Thermal performance

Glazing option	Overall system U-value
Double glazed	n/a
Triple glazed	from 1.1 W/m²K

KEY FEATURES

- **Award-winning system**
Winner of the Build It award for 'Best Glazed Doors'.
- **Ultra-slim frames**
Narrow sightlines of just 45mm, narrower than any bifold door on the market.
- **Industry leading**
Surpasses all other slide and turn door systems on the market for performance, quality and precision engineering.
- **Made in Britain**
Exclusively made in Britain to a patented Swiss design.
- **Incredible thermal performance**
Achieves incredibly low U-values, from just 1.1W/m²K.
- **Completely flush track**
The innovative track can be recessed to create a completely flush finish between inside and out without reducing weather performance, thanks to innovative flipper seal technology.
- **Designed to your requirements**
Can be manufactured to open inwards or outwards to suit your home..
- **Flexible opening**
Panels can be opened completely or part-opened to provide ventilation.
- **Thermally broken**
Insulated multi-chamber construction prevents cold bridging.
- **High security**
Innovative interlocking connection between panels combined with extending side jamb provides excellent security protection.
- **Large openings achievable**
Can be configured with up to 14 panels for openings as large as 13.6m wide.
- **Smooth running**
Top hung system precision engineered for effortless operation and easy opening.
- **Available in a range of colours**
Choose from Slate Grey (RAL 7015) matt, Anthracite Grey (RAL 7016) matt or Graphite Black (RAL 9011) matt finishes as standard or opt for one of 200+ bespoke RAL colours to perfectly match your home.
