HERITAGE DOORS

ART DECO INSPIRED FRENCH,
BIFOLD & SLIDING DOORS

Art Deco inspired aluminium heritage doors

Available as French doors, single doors, bifold doors or sliding doors, IDSystems' range of aluminium heritage systems are a contemporary alternative to traditional steel doors and perfectly suited to period properties or for adding character to new-build homes, extension projects or renovations.

The neo-industrial appearance owes a lot to tradition, with the original style of forged steel doors and windows dating back to the 1880s, before becoming hugely popular during the Art Deco era of the late 1920s and early 1930s.

Today all our heritage door systems are made from the latest in highly engineered and thermally broken aluminium, providing superior security performance, thermal efficiency and weather protection whilst maintaining the original aesthetic appeal.

Heritage bifold doors

Utilising the advanced technology and innovation of the SUNFLEX SF75eco system, our heritage bifold doors provide a combination of the much sought-after Art Deco style with the ability to fold the doors to one end to create a completely unobstructed opening.

Technical:

Glazing option	Overall system U-value*
Double glazed	from 1.3 W/m²K

Heritage French doors, single doors and sidelights

Available as single doors or French doors on their own or paired with sidelight windows for larger openings, our heritage doors provide slender sightlines of just 59mm. Whilst our heritage doors are mostly utilised for external purposes, they can also be used internally either on their own or as part of a larger glazed screen.

Technical:

Glazing option	Overall system U-value*
Double glazed	from 1.4 W/m²K

*Thermal performance achieved is dependent on glass specification

Heritage sliding doors

With the capability to include panels up to 2m wide and provide a seamless transition between inside and out, our heritage sliding doors utilise the style and performance of our award-winning sliding doors to create the perfect match of aesthetic appearance and usability.

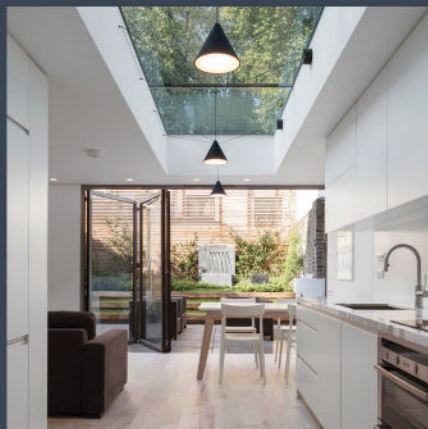

Technical:

Glazing option	Overall system U-value*
Double glazed	from 1.2 W/m²K
