

FRAMED OR FRAMELESS

GLASS PARTITIONS

ULTRA STYLISH GLAZED
SLIDING AND SLIDE & TURN DOORS

Hugely versatile sliding and slide & turn glass partitions

Inside or out, the SUNFLEX range of sliding and slide & turn glass partitions make a statement. Available in frameless or framed Art Deco style designs, the systems are hugely versatile and can be utilised in a variety of ways, including acting as a room divider for open-plan spaces internally or surrounding outdoor kitchens and patios externally.

The single glazed sliding partitions can be designed with 1 to 12 panels that open from the centre or from one (or both) end with panels from 300mm to 1600mm wide and from 500mm to 2600mm high. They can even be designed to open up corners or slide into a pocket in the wall.

Available as a frameless single glazed system (SF25) or framed double glazed (SF35) design, the clever slide & turn partitions feature individual, non-connected panels which slide to the end of the track and turn to stack neatly out of the way - creating completely unobstructed openings.

SF20 | frameless sliding partitions

The SF20 is the ultimate in minimalist style. Fully customisable and with a range of glazing options, internally the system is perfect for dividing up open-plan living spaces, ideal for stopping unwanted cooking smells wafting through the house or when you just want a bit of peace and quiet at home.

Externally the SF20 has proven hugely popular for enclosing patios to create winter gardens or for surrounding outdoor kitchens, protecting garden furniture and appliances from the worst of the wind and rain.

SF22 | framed sliding partitions in Art Deco style

Designed with slender external frames and horizontal bars across the glass, the SF22 is a stunning alternative to traditional steel glazed screens. Equally suited to period properties or for adding character to modern homes, the SF22 is ideal for dividing open plan spaces in your home.

Customise your doors with a range of colour options and choose the number of horizontal bars to suit your style. A hugely popular option, the system has been utilised to separate kitchens from living/dining rooms, to divide a bedroom from a walk-in wardrobe, dressing room or en-suite or to act as a partition between home and gym or swimming pool.

SF25 & SF35 | slide & turn partitions

With the ability to stack the panels neatly at one end, the SF25 and SF35 slide & turn systems are ideally suited as an alternative to the SF20 and SF22 sliding systems, both as an internal room divider or for use externally.

With panels up to 800mm wide and up to 2800mm high the doors are available with a range of hardware, track, locking and glazing options, whilst the frames of the SF35 can be powder-coated in a choice of more than 200 RAL colours and finishes.
