

A modern kitchen interior featuring a large, rectangular glass lantern roof that allows natural light to flood the space. The kitchen has dark grey cabinetry, a dark countertop with a stainless steel sink and faucet, and a built-in pantry with open shelving. A potted fern sits on the right side of the counter, and a bowl of fruit is on the left. The floor is made of large, light-colored tiles.

GLASS LANTERNS & ROOFLIGHTS

CUSTOM MADE FRAMELESS
GLAZED ROOF SOLUTIONS

Create light-filled spaces with frameless rooflights & lanterns

Our stunning minimalist flat rooflights and frameless lanterns are the ideal solution for creating bright, open interiors - perfect for new builds, extensions, or renovation projects.

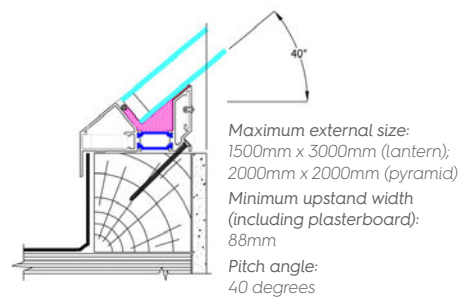

Combining exceptional performance with contemporary aesthetics, these advanced systems are designed to maximise the amount of natural light entering the space below. The frameless internal finish creates a clean, uninterrupted view of the sky, enhancing the sense of space and light.

Each rooflight and lantern is handmade by our skilled team to meet your exact requirements. We offer a wide range of sizes and configurations - from elegant single or multi-pane **flat rooflights** and structural **walk-on designs** to expansive **frameless lanterns** - allowing complete design flexibility.

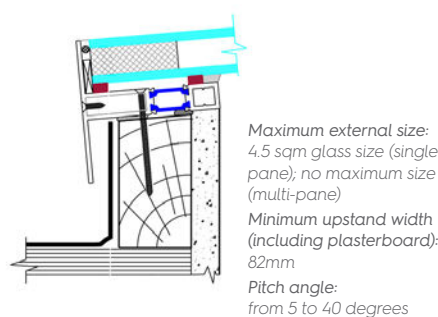

All three systems are built using highly insulated, thermally broken frames that are hidden from view when installed. As standard, they feature sealed glass units with solar control toughened glass and a self-cleaning coating, delivering long-lasting clarity and superior energy efficiency.

Our lanterns come with a 40-degree pitch as standard. The glass panels are silicone joined which means no frame is required ensuring a sleek, seamless appearance without compromising performance.

KEY FEATURES

- **Outstanding design**
Minimalist systems with no visible frames when viewed from below.
- **Made to order**
Each of our rooflights and lanterns are made to your exact requirements.
- **In-house fabrication**
High quality components, hand assembled by our skilled staff.
- **Walk-on rooflights**
Our rooflights can be manufactured as walk-on designs (ideal for basement conversions or roof terraces) with clear or anti-slip glass.
- **Multi-pane designs**
For larger apertures, our flat rooflights can be created as frameless multi-pane designs.
- **Self-cleaning glass**
All our glass roof solutions are made with toughened glass that includes a self-cleaning coating.
- **Solar control glass**
To minimise solar heat gain our rooflights and lanterns are manufactured with solar control glass as standard.
- **Opening elements**
Customise your rooflight or lantern with manual or electrically controlled opening.
- **Energy efficient**
Thermally broken systems achieve an incredibly low U-value of just 1.0W/m²K when triple glazed.
- **Weatherproof**
48mm overhang for rooflights and 23mm overhang for lanterns creates better weather seal.
- **Colours and finishes**
Available as standard in Jet Black (RAL 9005) and Anthracite Grey (RAL 7016), or opt for one of more than 200 RAL Classic colours and finishes to complement your home.

Looking to go larger?

Our expertise extends to bespoke structural glass roofs for larger or more complex projects. From lean-to roofs to multi-hipped designs, we offer custom-engineered solutions with unobstructed spans of up to 6 metres - ideal for bold, light-filled architectural statements.
