BALUSTRADES

FRAMELESS BALUSTRADES COMBINING
STYLE, FUNCTION & SAFETY

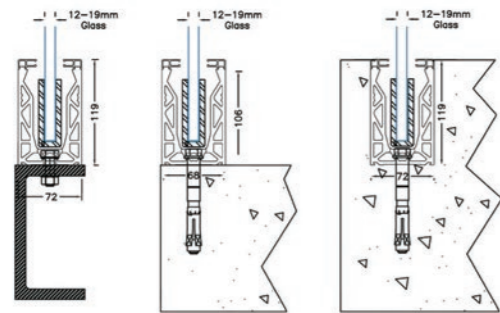

Glass balustrades

Custom designed, frameless glass balustrades for terraces, patios and balconies - available with a range of channel details or integrated with a door system.

Each IDSystems balustrade is designed and manufactured specifically for your project, whether that is a high-rise apartment complex or a Juliet balcony on the first floor of an extension. Every design is tested to meet and exceed the loads required under Building Regulations. Over the years we have supplied and installed frameless balustrades for some of the most demanding and ambitious projects in the country and our systems have been utilised for both residential and commercial builds.

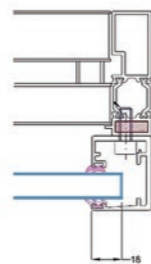

We offer a choice of two systems depending on your requirements. For larger spans our channel system is supported by a continuous brushed aluminium channel which can be surface mounted or recessed into the floor to create a flush finished between ground and glass. For Juliet balconies our integrated system can be fitted alongside the frame of the doors, creating a stylish and minimalist design where the outer frame is not seen from the inside.

Channel system

Access to underside of steel required at time of installation. Water can drain through fixings, provision to be allowed in design

Integrated system

Ideal Juliet balcony solution
Maximum width 2500mm

KEY FEATURES

- **Custom designed and manufactured**
Made to your exact specification and requirements, specifically for your project.
- **Designed with more than safety in mind**
All of our balustrades have been tested and have the certification to prove compliance with Building Regulations Part K.
- **Seamless design**
The frameless design breaks down the boundaries between interior and exterior.
- **Versatile system**
Used for balconies, Juliette balconies, patios, staircases, landings, verandas and terraces.
- **Perfect for coastal locations**
Available with marine grade components, ideal for harsh coastal locations.
- **Minimal visual impact**
Negates the need for brackets or posts making it ideal for maximising the amount of light let into a property or for making the most of a view out.
- **Residential or commercial applications**
Used widely for domestic properties and also shopping centres, offices, public buildings and bars or restaurants.
- **Infinite configuration options**
Can be used around corners of any angle and can be designed in short sections or in longer configurations for larger properties.
- **Personalise your glass specification**
We can tailor the specification of your toughened laminated glass to your exact requirements.
- **Internal or external uses**
From domestic landings and staircases to commercial applications in shopping centres our glass balustrades are just as at home inside as they are out.
- **Range of channel and fixing options**
Depending on your project and the configurations chosen there are a number of options for fixing glass balustrades into your design.
- **Options for finishing touches**
There are a number of options to ensure balustrades are completely in keeping with your home or project, including the addition of circular brushed stainless steel handrails.
- **Expert technical advice and support**
For more than 20 years IDSystems has provided industry leading glazing solutions for tens of thousands of projects right across the UK, all backed up by our expert technical advice and support.

Technical support

Understanding the exact specification of balustrades for any given requirement can be challenging, that is why we employ a dedicated technical team that are experienced in working with architects, structural engineers and contractors to provide the optimal solution for your home, both in terms of visual appearance and technical performance.
